Notes:
Multi-Seed 128 - These varieties have 2-3 seedlings per cell, for varieties that do better with higher density plantings. Snapdragon (Not pinched), Stock, and Flowering Kale. Do not thin. Plant one Multi-Seed plug per 6" square of support netting.
OW - Over Winter - These varieties are planted in early fall for flowering the following spring/early summer. Winter protection with high tunnel, caterpillar tunnels, or row cover recommended. Check with other growers in your area, or your Field Rep to be sure varieties selected will overwinter in your zone.
FB - Fall Blooming - These varieties are planted in summer, for fall blooms. A heated greenhouse may be needed for crops planted later, for blooming in November/December. Flowering Kale planted in September is for a Holiday crop grown in cool greenhouse.
 ***** Order in advance. Excess trays will not be available. *****
